

Fountains & Aeration

Learn how to bring out the **BEST** qualities of your waterbody.

Aeration will:

- Improve Your Water Clarity
- Lower Algae Growth
- Deter Mosquitos
- Promote Healthy Fish Life and Plant Species

Aeration is the one expense that can make the **most improvement** in the appearance and productivity of a lake or pond.

- Without proper oxygenation, water may become stagnant, overrun with algae, emit unpleasant odors, and become a breeding ground for mosquitoes
- **Aquagenix** analyzes your water body and suggests which type of aeration is most suitable and cost-effective
- A floating fountain used in conjunction with bottom aeration will provide you the best overall results
- This method helps the overall health of your lake or pond and makes it aesthetically pleasing, turning your property's waterbody into an asset of the community

As Florida's leader in fountain and aeration systems, **Aquagenix** offers a wide range of systems to fit your needs, including state-of-the-art LED lighting and solar systems which significantly reduce or eliminate expensive electrical wiring and monthly electric bills.

Aquagenix will custom design the perfect system to meet your specific requirements. Contact us today for a free consultation!
